

Dillon came to us as a stray with a really bad cherry eye in February 2011. Dillon had surgery in order to see out of his left eye and decrease the pain and irritation this cherry eye was causing him. Dillon see's wonderfully now and has no visual problems at all. Dillon was adopted in March 2011

\* Surgery done by Dr Caylor of [All Pets Vet](#) in Rancho Palos Verdes, total cost of his surgery was \$384.00. Dillon was also neutered and fully vaccinated.
